The Inspector D4000 is the industry’s most flexible and cost-effective traditional bar code verifier. This unit comes with your choice of a traditional laser scanner, for point-and-shoot simplicity or an optional patented Auto-Optic scan head with four aperture sizes and two light wavelengths (eight different optical configurations).

Printed reports can also be generated, using the optional direct thermal printing unit.

### Features

- Dual Mode Portability: Traditional Operation, or ISO / ANSI Mode Operation (optional auto-optic required)
- Non-Contact Point-and-Shoot Bar Code Capture
- Print Gain Measurement
- Auto-discriminates Between All Popular Symbologies
- Multiple Scan Averaging
- Follows the ISO15416 and ANSI X3.182 Bar Code Inspection Methods *(auto-optic scan head only)*
- Conforms to ISO15426-1 Bar Code Verifier Specification *(auto-optic scan head only)*
- Option for Full ISO/ANSI inspection and Reporting

This flexible and cost-effective unit is also easy to use, and supports all popular linear symbologies. The RJS D4000 offers store and print capability, multiple scan averaging, and sub-symbology choices—all easily accessible through a simple four-button user interface.

Bar code analysis information appears immediately on the 32-character alphanumeric liquid crystal display (LCD), and a distinct audible tone and a series of five colored LEDs indicate whether a bar code is in or out of specification. In addition to the ISO/ANSI method parameters, Traditional Analysis parameters are provided on the LCD, without a special mode setting.
Inspector D4000L
Bar Code Verifier
by RJS TECHNOLOGIES

Features
- Traditional Test Method
- Print Gain Measurement
- Auto-switch Symbologies
- Automatic Power Off
- Inspection Report Storage Buffer
- ISO/ANSI Scan Profile Test Method (optional)
- ISO/ANSI 10-scan Averaging (optional)
- Aperture/Wavelength selection via menu option (optional)
- Detailed Hardcopy Printout (optional)

Verification Methods
Parameters determined by ISO/ANSI bar code print quality guidelines and traditional pass/fail criteria. Refer to model matrix below for configurations.

Mechanical
- Weight: 21.4 ounces (607 g)
- Power: 4 AA Alkaline or NiCad batteries and AC Charger (optional)
- Case: Acrylonitrile Butadiene Styrene (ABS)
- Beeper: Audible tones indicate an audible pass/fail and low battery
- Display: 4 line X 8 character LCD
- Keypad: 4-button, on, select, enter, print
- LEDs: 5 LEDs (two red, one yellow, and two green)

Environmental
- Operating Temperature: 50° to 105° F (10° to 40° C)
- Storage Temperature: 14° to 158° F (-20° to 50° C)
- Relative Humidity: 5% to 80% Non-condensing

Optical
- Test Aperture: Laser Scanner: minimum ‘X’ dimension 5 mil
  - Auto-Optic option A: 3, 5, 10, and 20 mil (optional)
  - Auto-Optic option B: 3, 6, 10, and 20 mil (optional)
- Wavelength: Visible: 660nm
  - Infrared: 925nm (optional)

Symbologies

Regulatory
- FCC Class A, CE Certified
